EXPERIENCE

Rackron Technologies PVT. LTD | Web Developer

Mohali, Punjab | Jan 2025 - July 2025

Developed and maintained MERN stack web applications using HTML, CSS, Bootstrap, JavaScript, React.js, Node.js, Express.js, and MongoDB.

Built responsive and interactive user interfaces with React.js and Bootstrap.

Improved website performance, responsiveness, and user experience.

Collaborated with the development team to enhance problem-solving and debugging skills.

SKILLS

Programming Languages: Html, CSS, JavaScript

Libraries/Frameworks: React, Bootstrap

Tools / Platforms: GitHub, git, WordPress, VS Code

Databases: MongoDB

PROJECTS / OPEN-SOURCE

Portfolio | [Link](#)

HTML, CSS, JavaScript, React

I made a personal portfolio website using HTML, CSS, JavaScript, and React.js. It shows my skills, projects, and education details in a clean layout. I used React to create different sections like About, Projects, and Contact. The website works well on both mobile and desktop screens.

Learnify | [Link](#)

HTML, CSS, Bootstrap

I created a course website called Learnify using HTML, CSS, and Bootstrap. The website allows users to explore different learning categories in a clean and responsive design. I used Bootstrap components to make the layout mobile-friendly and fast to build. It includes sections like courses, benefits, and contact.

Velvet Hotel

WordPress

I created a hotel website named Velvet Hotel using WordPress. It includes pages like Home, About, Services, Blog, and Contact Us to showcase hotel features. I used WordPress themes and plugins to design the site without coding. A navigation bar with icons helps users easily explore all sections. The website is mobile-friendly and manageable through the WordPress dashboard.
